UNIT 7

Suspension System

Contents

7.0 Introduction
- 7.0.1 Functions of Suspension System
- 7.0.2. Properties of Suspension system

7.1 Springs
- 7.1.1 Steel Spring Types
- 7.1.2 Rubber Spring Types
- 7.1.3 Air Spring

7.2 Helper Spring

7.3 Types of Suspension System
- 7.3.1 Conventional Suspension System
- 7.3.2 Independent Suspension System
  - 7.3.2.1 Wish Bone Type
  - 7.3.2.2 Vertical Guide Type
  - 7.3.2.3 Trailing Link Type
  - 7.3.2.4 MacPherson Strut Type
  - 7.3.2.5 Swing Half Axle Type
  - 7.3.2.6 Rear Independent Suspension System
- 7.3.3 Air Supension System

7.4 Advantages and Disadvantages of Independent Suspension System

7.5 Shock Absorber
- 7.5.1 Friction Type
- 7.5.2 Hydraulic Type
- 7.5.3 Air Type

7.6 Suspension System Trouble Shooting
- 7.6.1 Noise In Suspension System
- 7.6.2 Frequent Failure in Leaf Spring
- 7.6.3 Uncomfortable Ride in Vehicle

R6QN5X

Learning objectives

1. Explain about the various types of Springs used in automobiles
2. Describe about the construction and working principle of various suspension system used in automobiles
3. Explain about the purpose types and operations shock absorbers
