- Tabulate the reading.
- Repeat the same procedure for other cells.

Cell voltage tester

Cell voltage tester is used to check the volt for cell.

Remove the vent plug and check the voltage if cell by using voltage tester.

Tabulate the following.

Repeat the same procedure for other cells.

Maximum cell voltage per cell is 2.1.V it depends on specific gravity of the electrolyte.

S. No.	Cell No.	Volt
1.		
2.		
3.		
4.		
5.		
6.		

Result

The charge condition of battery is checked.
