PART - A

One mark questions

Choose the correct answer

1. In transmission system, the clutch is placed in.
   a) Second Place
   b) First Place
   c) Fourth Place
   d) Sixth Place

2. How many types of multiplate clutch?
   a) 1 b) 2
   c) 3 d) 4

3. Where the clutch lining is fixed?
   a) Both Edges Of The Clutch Plate
   b) Fly Wheel
   c) Pressure Plate
   d) Both B And C

4. In which speed the disengagement is impossible in centrifugal clutch?
   a) 600 rpm
   b) 800 rpm
   c) 900 rpm
   d) 1000 rpm

5. The clutch works on the principle of.
   a) Lever Principle
   b) Pascal's Law
   c) Friction
   d) Faraday's law

6. In this clutch, there is no clutch pedal?
   a) Single Plate Clutch
   b) Centrifugal Clutch
   c) Multiplate Clutch
   d) Diaphragm Clutch

7. Name the part which is static part in fluid flywheel?
   a) Driving Member
   b) Driven Member
   c) Flywheel
   d) None of the Above

8. When the clutch cover assembly rotates, all clutch parts are.
   a) Rotates With Assembly
   b) Static Position
   c) Rotates Separately
   d) None Of The Above
