9. Under the following, which type of clutch works smoothly.
   a) Cone Clutch
   b) Multiplate Clutch
   c) Single Plate Clutch
   d) Fluid Fly Wheel

10) Multi plate clutch is used in.
   a) Two Wheeled Vehicles
   b) Four Wheeled Vehicles
   c) Six Wheeled Vehicles
   d) Three Wheeled Vehicles

PART - B

Three mark questions

1. What are the functions of clutch?
2. What are the materials used to make clutch linings ?
3. What are the merits of diaphragm clutch?
4. What are the reasons for clutch noise?
5. What is clutch plate?
6. How many types of multiplate cluth? Give the types.
7. Write the reasons for clutch slip.
8. Write any three types of clutch.
9. What are the troubles in clutch?
10. Give the location of clutch.

PART - C

Five mark questions

1. Draw and explain about working principle of clutch.
2. Draw and mark the parts of diaphragm clutch.
3. Tabulate the trouble shooting of clutch.
4. List out the merits and demerits of fluid flywheel.
5. Draw and mark the parts of clutch plate.

PART - D

Ten mark questions

1. Draw and explain about single plate clutch.
2. Explain the construction and working of multiplate clutch.
3. Draw and explain about centrifugal clutch.
4. Tabulate the common trouble shooting of clutch.
