UNIT 5

Wheels and Tyres

Contents

5.0 Introduction
5.1 Requirements of the Wheel
5.2 The Properties of the Wheel
5.3 Types of Wheel
  5.3.1 Disc Wheel
  5.3.2 Wired Wheel
  5.3.3 Cast Wheel
5.4 Wheel Dimension
5.5 Tyre
  5.5.1 Types of Tyre
5.6 Properties of The Tyre
5.7 Functions of Tyre
5.8 Tyre Construction
  5.8.1 Bead
  5.8.2 Side Wall Region
  5.8.3 Shoulder Region
  5.8.4 Tread Region
5.9 Tread Types
  5.9.1 Stud Type Tread
  5.9.2 Symmetrical Type Tread
  5.9.3 winter Type Tread
5.10 Ply Rating
  5.10.1 Tyre Size Marking
5.11 Types of Carcass
  5.11.1 Radial Ply Tyre
  5.11.2 Cross Ply Tyre
  5.11.3 Bias Ply Tyre
5.12 Load Rating
5.13 Tyre Pressure
5.14 Selection of Tyre
5.15 Tyre Wear
5.16 Maintenance of Tyre
5.17 Tyre Damages And Repairing Methods
5.18 Tube
5.19 Uses of Tubes
5.20 Puncture
5.21 Puncture Recovering
  5.21.1 Hot Patch Method
  5.21.2 Cold Patch Method
  5.21.3 Vulcanizing
5.22 Tube Damages And Repairing Methods
5.23 Tyre Rotation
5.24 Wheel Balancing

KMY3UB

Learning objectives

1. Understanding of different tyres used in vehicles.
2. Understanding the stability of manufactured tubes and tyres.
3. Understanding how wheels are produced with stability and its suitability for use in the vehicle.
4. Understanding how the wheels and tyres withstand the weight of the vehicle on the road and stability of rolling on the road.
