nutritious food is provided for two days to women who have delivered in health facility especially at Community health centre level. This food is cooked by self-help groups.

Janani Express Yojana

Providing benefit of transportation to expectant mothers for institutional deliveries to deal with emergency circumstances during the pre and post delivery period.

CONCLUSION

This chapter dealt with Maternal health which includes physiology of menstruation and it's abnormalities. This chapter also has the process of fertilization, embryonic and fetal development discussed. It will help the students to do the antenatal and postnatal assessment to give proper care. This maternal health also discussed about family planning and insist upon the health education aspects during perinatal periods.

Population burden in Tamilnadu

POPULATION IN URBAN ACCLOMERATIONS IN TAMIL NADU		
	2001	2011
Chennai	6,560,242	8,696,010
Coimbatore	1,461,139	2,151,466
Madurai	1,203,095	1,462,420
Tiruchirapalli	866,354	1,021,717
Tirupur	550,826	962,982

So as Future Nurses, you have a major role in educating the importance of family planning methods to the community

A-Z GLOSSARY

Menstruation (மாதவிடாய்)	-	It is a visible manifestation of cyclic physiologic uterine bleeding due to shedding of the endometrial following invisible interplay of hormones mainly through Hypothalamus-Pitutary-Ovarian axis.
