DO YOU KNOW?

World breast feeding week is an annual celebration which is being help every year from 1-7 August is more than 120 countries.

6.5.5 Weaning

It is the process of gradually introducing an infant to what will be its adult diet and withdrawing the supply of its mother milk.

Begin the Weaning by 6 Months

Upto six months no other foods (including water) should be given except breast milk.

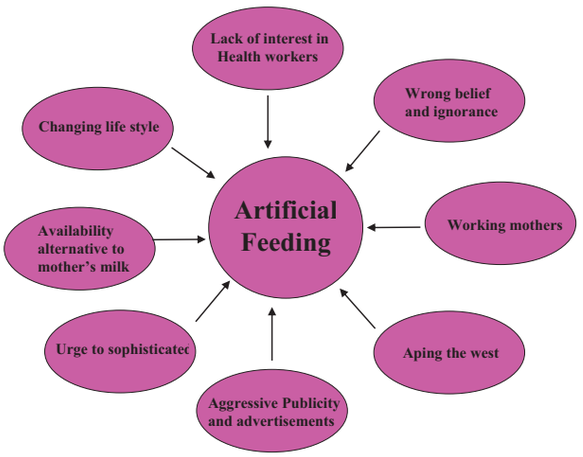

Problems during Weaning

1. If breast feeding is stopped, suddenly, it can have psychological and nutritional effect on the young children.
2. Solid foods can cause diarrhoea if not digested properly.
3. If weaning foods are too poor to provide adequate nutrients, the children can develop malnutrition.

6.6. ARTIFICIAL FEEDING

When the infant is feed by any preparation other than breast milk is called artificial feeding.

Factors contributing to rising incidence of artificial feeding in India

Indication

- Contraindication of breast feeding either temporary or permanent reason.
- Mother reluctant in breast feeding.
- Inadequate of breast milk as evidenced by first feeding.
- Changing life style of women or pressurized under socio economic condition.

Foods used

There is no perfect substitute for breast milk. In general boiled liquid cow's milk various dried milk preparation and to a lessen
