an intense, rapid response and that can be addressed with existing community. Effective emergency response refers well-orchestrated team work in which each member knows what the lines of authority and communication are.

Required Elimination

1. Includes preparedness and response plans for relevant emergencies and threats (Natural, mechanical, biological and human)
2. Address the needs of visitors, structures and staff.
3. How to protect, evacuate and recover collection is the event of a disaster.
4. Assign individual responsibilities for implementation during the emergencies.
5. Include flood plan.

8.5 REHABILITATION

Rehabilitation, reconstruction and sustainable recovery refer to measures that help restore the livelihood assets and production levels of emergency-affected communities. These measures rebuild essential infrastructure, institutions, services and restore the means of production destroyed or made non-operational by a disaster.

Post disaster response has been typically at three (now four) levels.

Relief: Immediately after the calamity, lasting from the first 24 hours to about two to three months and catering to immediate shelter, food, water and medical assistance.

Reconstruction: Following relief and extending to a period of approximately two years, aimed at rebuilding the basic physical infrastructure and shelter to enable people to begin fresh start.

Rehabilitation: That looks at more long-term inputs of reinstating lost livelihoods, introducing new economic opportunities and improving land and water management processes so as to reduce people's vulnerability and enhance capacities to handle future calamities.

Readiness: A response which should ideally have been a proactive measure, it should enhance preparedness in identified vulnerable regions by introducing mechanisms and methods of construction that mitigate impacts of future disasters. Reconstruction and rehabilitation need to be in a seamless continuum with restoration efforts.

8.6 LEGAL IMPLICATION

Ethical and Legal Aspects of Disaster Response. Incorporation of ethical principles and legal standards into all phases of the disaster cycle is fundamental to effective and fair disaster response, but the complex information landscape makes meeting this goal challenging

8.6.1 Acts and Laws

The **Disaster Management Act,** 2005, was passed by the Rajya Sabha on 28 November, and by the Lok Sabha on 12 December 2005. It received the assent of The President of India on 9 January 2006. The Disaster Management Act, 2005 has 79 sections in set of 11 chapters. The Act extends to the whole of India. The Act provides for the effective management of disasters and for matters related with it.

The act provides formation of the following to combat disaster:

- National Disaster Management Authority
