CASE STUDY: 7

1. Meena is a 29 year old female approached to the Emergency Department with dyspnea, myalgia, and rhinorrhea. Her symptoms began approximately 1 day ago and are continuous, steadily getting worse. She is having significant nasal discharge but minimal cough. Her 4 year – old son has experienced rhinorrhea as well over the past 3 days, but is not as ill as she is. She has no significant past medical history, and takes no routine medications. She reports receiving the flu vaccine when her child first fell ill, 3 days ago. Meena was diagnosed with influenza via swab test, she was admitted to the hospital for respiratory problem and started on the antiviral tamiflu (oseltamivir). She was discharged after five days of hospitalization with good improvement in oxygenation.
   1. What health education you will give her to keep other family members safe from flu?
