Procedure:

1. Wash hands to prevent cross infection
2. Fill the hot water bag with boiled water half or one - third. Place the hot water bag over a flat surface like table and expel all the air by forcing the water up to the neck of the bag
3. Cork it tightly, dry the outside of the bag and check it for leakage by turning the bag upside down
4. Put on the cover and take it to the bedside
5. Apply to the area as ordered with the towel or sheet
6. Keep the bag for 20-30 minutes intermittently

After care of the patient and articles:

- ❖ Remove the hot water bag after completion of the treatment
- ❖ Observe the area for any redness
- ❖ Provide comfortable position to the patient
- ❖ Take all equipments to utility room
- ❖ Empty the hot water bag and hang it upside down to dry it
- ❖ Clean all articles with soap and water and replace it in the usual place
- ❖ When the bag is dry, fill it with air, cork it and keep it in its proper place

Recording and Reporting:

- ❖ Record the procedure with date, time, effect of application and complication due to procedure etc in nurses record
- ❖ Report to the ward sister about the treatment

Examples of hot applications

Sun Bath

Heating pads

Short wave diathermy
