Local cold application

Ice cap (Dry cold)

Indications

- Fever
- Bleeding
- Allergy
- To reduce edema

Articles required:

- Ice cap with cover
- Ice in bowl
- Salt
- Teaspoon
- Duster to wipe ice cap
- Treatment mackintosh

Procedure:

1. Explain the procedure to the patient
2. Fill the ice bag with water, put in the stopper turn the bag, upside down to check for any leakage
3. Fill the bag half to two – third with crushed ice
4. Sprinkle salt (NaCl)
5. Keep the bag on a flat surface and squeeze out the air, presence of air will interfere with the thermal conductivity
6. Screw the cap tightly
7. Wipe outside of the bag and put on the cover

8. Apply the ice bag over the area.
9. Clean the area with a bath towel
10. Make client comfortable

After care of the patient and articles:

- Clean the equipment and replace it in the proper place
- Discard the crushed ice cubes
- Wash hands
- Document the care with date, time, site and duration of the application
