Unit 7

NUTRITION - THERAPEUTIC DIET

Introduction :

According to WHO, Health is a state of complete physical, mental, social well being and not merely an absence of disease or infirmity. To maintain good health ingesting a diet containing the essential nutrients in correct amount is very important.

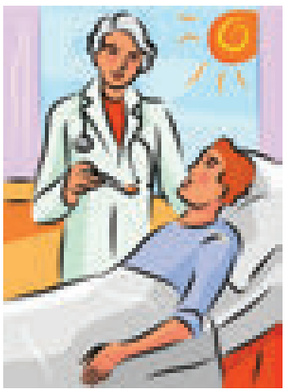

Balanced diet is one, which contains the different types of foods in such quantities and proportion so that the need for calories, proteins, minerals, vitamins and other nutrients are adequately met in small proportion is made for extra nutrients to withstand duration of illness.

Factors:

1. Age
2. Sex
3. Physical work
4. Physiological stress
5. Pregnancy
6. Lactation

Five groups:

- ❖ Cereals, grains & products
- ❖ Pulses and legumes
- ❖ Milk and milk products
- ❖ Fruits and vegetables
- ❖ Fats and sugar

Points to keep in the mind while planning menu:

1. Energy derived from cereals should not be more than 75%
2. Whole grain cereals, parboiled grains or malted grains give higher nutritive value.
3. It is better to include 2 cereals like rice and wheat
4. Flour should not be sieved for chapatti as it will reduce bran content
5. One serving of cereal is 25g. A day's menu may require 2-4 servings
6. Minimum ratio of cereals, proteins should be 4% in terms of the grains it will be 8 parts of cereals and one part of pulses
7. One serving of pulse is 25g. 2 to 3 servings should be taken
8. One serving of vegetables is 75g Green leafy vegetables can be taken more than one serving, if fruit is not included in the diet
