Unit 9

HOME CARE MANAGEMENT

Home nursing is that component of continuum of comprehensive health care, where by health services are provided to individuals and familiar in their places of resistance for the purpose of maintaining, promoting, restoring health to the maximum level of independence with minimal illness.

Concepts:

Client: is being a Rational, biological, emotional, social desiring to the use of home care services.

Family: The loved one and any other individuals present in the home, who is willing to participate in care providing to the client to maintain self **care at home.**

Professional nurse: Individual with license to practice professional nursing at state.

Quality of care: Care means standards for home health practice, certification, accreditative standards.

Self care capability: Ability to perform activities of daily living that permit the individual to live independent tautly at home.

Guidelines:

As much as possible you learn the culture of the patients with whom you work, so you will understand the cultural practices and values that influence their health care practices.

Provide culturally and linguistically competent assessment by understanding the meaning of language and non verbal behaviour of a patient's culture.

Be sensitive to the fact that the individual or family you are assessing has other priorities that are more important to them. These may include financial or legal problems. Do not provide financial or legal advice. But make sure to connect the patient to someone who will help them.

Purposes:

- To prevent disease
- To treat the patient
- To relief their suffering and make them comfort
- To support the patient, family
- To utilize and to adapt the home equipment
- To respect the families beliefs and ways of doing things as far as possible
