Principles:

- ❖ Build a good rapport to family
- ❖ Collect information about the family size, occupation, education, religion, customs etc
- ❖ Identify the problems.
- ❖ Discuss the problems with the family members
- ❖ Guide them to carry out problems

1. **Fever:** When a person body temperature is too warm, he may have fever. Fever itself is not a sickness. However high fever can be dangerous, especially in a small child. The normal body temperature is 98.4^0 F or 37^0C. More than 100^0F is consider as fever.

Home management:

- ❖ Uncloth the patient, if it is an infant uncover the entire body
- ❖ Ventilate them with fresh air
- ❖ Apply cold compress wet sponge
- ❖ Provide lot of water or juices
- ❖ Administer tablet paracetamol according to the weight of the person
- ❖ Check temperature every half an hour
- ❖ If not reduced refer the child to health centre

2. **Diarrhoea:** When a person has loose or watery stools, it's known as diarrhoea. Lack of water is the body due to diarrhoea is called dehydration.

Signs of dehydration:

Thirst is often a first signs of dehydration

- ❖ Diminished urination
- ❖ Dark yellow urine
- ❖ Sudden weight loss
- ❖ Dry mouth
- ❖ Sunken eyes
- ❖ Loss of elasticity of the skin

Home management:

- ❖ Give lots of liquids to drink and give rice porridge
- ❖ Food intake – as soon as the sick child or adult will accept food. Give frequent feeding of food what he/she likes and accepts
- ❖ For babies feed breast milk often

6 Level Tea Spoons of Sugar
